SUMMARY

Applied ML engineer with 7+ years building retrieval, ranking, and production NLP systems. Strong React/Node delivery record. Seeking a Senior AI Research Scientist role with ownership of model training, evaluation, and research-to-product transfer.

SKILLS

ML / AI: PyTorch, Transformers, Retrieval, Ranking, LLM fine-tuning, Evaluation

Engineering: Python, TypeScript, React, Node.js, AWS, GraphQL, CI/CD

Research-adjacent: Experiment design, error analysis, literature review

EXPERIENCE

Staff Machine Learning Engineer | NovaLabs | Bangalore

2021 - Present

- Designed a retrieval + ranking flow serving 2M+ queries/day; +11% NDCG@10.
- Fine-tuned domain LLMs for search assistants; reduced hallucination rate by 18%.
- Partnered with product on evaluation harnesses and human-in-the-loop review.
- Mentored 4 engineers; established model-release checklists and CI for training jobs.

Senior Software Engineer | Tech Solutions Inc. | Bangalore

2018 - 2021

- Architected microservices for 1M+ MAU; led React migration, 40% faster load times.
- Built internal labeling tools used by research and ops teams.
- Introduced CI/CD and observability for ML-adjacent services.

Software Developer | Innovatech LLC | Pune

2016 - 2018

- Delivered SPAs and REST APIs; collaborated with design on accessible UI.

EDUCATION

B.E. Computer Science | University of Technology | 2012 - 2016 | GPA 3.8/4.0

SELECTED PROJECTS

Open retrieval demo: hybrid dense + BM25 search with reranker (personal project).

Internal paper club: weekly notes on NeurIPS / ICLR applied-ML papers.

Dummy resume for FindNew ATS preview.
